

COINOMI – how to add Smchain

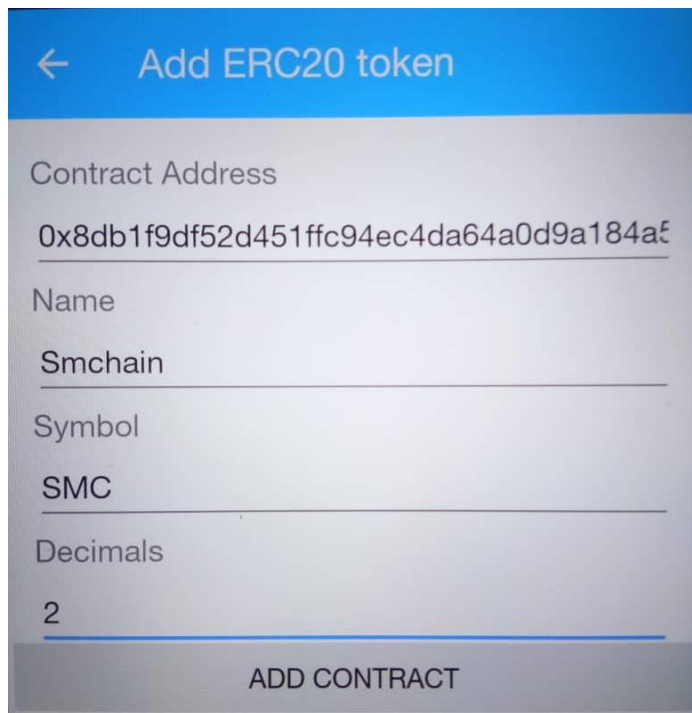

1. - On Android, after installed Coinomi, open the left side menu,
 - a. select "+tokens",
 - b. choose which ETH wallet you want to add the token to, and
 - c. tap the button at the bottom of the screen to add the token manually.

On iOS, open the left side menu, select "Settings", and then choose "Add Token" on the next screen. If you have more than one Ethereum wallet, you will be asked to specify which Ethereum wallet you are adding the token to. Select the correct Ethereum wallet. Press "Add Token Manually" in the bottom right.

2. - On the "Add Contract" page, enter the following information

- Contract Address: 0x8db1f9df52d451ffc94ec4da64a0d9a184a59200 (make sure there are no extra white spaces before or after the address).
- Name: Smchain
- Symbol: SMC
- Decimals: 2

← Add ERC20 token

Contract Address
0x8db1f9df52d451ffc94ec4da64a0d9a184a59200

Name
Smchain
